

Get More⁺

As a well servicing leader, we know what it takes to get a well back to expected production with speed and confidence. Key's rig services deliver value and time savings by minimizing downtime through the combination of better trained people, better equipment, and better technology. From drilling and completion, to production, to abandonment, **it's how Key is bringing more efficiency to the field.**

services + applications

- + well completions
- + well maintenance and repairs
- + workover services
- + plugging and abandonment
- + horizontal drilling

Rig Services

Key's extensive fleet of rigs includes a wide range of classes, including 1000+ hp, Class V self-propelled carrier or trailer-mounted rigs, for well servicing and drilling. With over 150 locations in 8 countries, each rig is available with ancillary equipment to help meet your needs.

Key can build custom packages that meet your specific well needs. Our P&A package for example, provides all the equipment necessary to plug and abandon a well, all from a single service provider.

+ integrated technologies such as our patented KeyView[®] automated control and monitoring system improve operational metrics from the moment Key arrives at the well site and comes standard with all our new rigs.

+ tailor-made rigs are designed and manufactured at our lean sigma manufacturing facility. This allows us to maintain the quality and reliability of our rig fleet and allows us to customize rigs to meet local or regional requirements. Weight-reduced and California emissions compliant rigs available.

rig specifications + packages

	class II	class III	class IV	class V
diesel engine rating	240 hp	365 hp	500 hp	>550 hp
max weight rating	up to 150,000 lbs	up to 225,000 lbs	up to 300,000 lbs	over 300,000 lbs
derrick height	72'	60'-104'	103'-116'	112'-118'
crew size	3	3	4	4-5

well servicing package

[well service rig + KeyView[®] System + fluid management + rental equipment]

P&A package

[well service rig + KeyView[®] System + cement pumps + cement units + frack tanks + wireline services]

ancillary equipment + services

- + Lean Rig Package
 - Internally guyed to base beams
 - Hydraulic catwalk
 - Hydraulic workflow
 - Hydraulic T-SIL
- + KeyView[®] System
 - Rig monitoring and control system
- + Hydra-Walk[®] System
 - Pipe handling – hydraulic assist
- + Cat Walk and Pipe Racks
- + Mud and Water Tanks
- + Mud Pit Systems
- + Shale Shakers
- + Hydraulic Tubing Tongs
- + Hydraulic Rod Tongs
- + Casing Tongs
- + Substructures
- + Generators and Lighting
- + Rig Mats and Mud Boats
- + Base Beams
- + Well Control Equipment
 - BOPs, accumulators, safety valves, adaptor spools and flanges
- + Top Drives
- + Fishing and Rental Tools
- + Nitrogen
- + Triplex Mud Pumps
- + Power Swivels
- + Plugging & Abandonment Equipment and Services
 - Perforating, cementing and casing jacks
- + Drilling Air Compressors and Boosters
