

A photograph of an offshore oil rig at night. The rig's derrick is illuminated with yellow lights, and the base of the rig is lit up with numerous bright lights. The sky is a deep blue with some clouds. The entire image is overlaid with a white grid pattern.

OPERATIONS MANAGEMENT ASSOCIATE PROGRAM

Key Energy Services is the largest provider of onshore well service rigs in the United States and one of the leading onshore, rig-based well servicing contractors in the world. We provide a complete range of well services, including rig-based well maintenance, workover, well completion and re-completion, fluid management, coiled tubing, fishing and rental, and ancillary oilfield services.

Our unique Operations Management Associate Program provides extensive training that no other well servicing company provides. We are currently seeking a strong Engineering or Business Management graduate to enter our two-year program. An Operations Management Associate will have the opportunity to observe, learn, and gain hands-on experience with every aspect of the rig workover business. This includes key areas such as:

- + Rig Operations
- + Health, Safety and Environment
- + The Keyview® System
- + Equipment Repair and Maintenance
- + Quality Assurance
- + Business Development
- + Functional Support

A successful candidate will be a graduate with a degree in Engineering or Business Management, who aspires to learn every aspect of the oil and gas services industry and pursue a career in management. This paid opportunity requires extensive travel to different locations around the country, including visits to the corporate office—located in Houston, Texas—throughout the two-year program.
